2. Claim 39-58 allowed.
3. The following is an examiner's statement of reasons for allowance: Prior art fails to show, a piezo-ceramic multilayer actuator having internal and external electrodes. Wherein, the internal electrodes having the same polarity arranged to offset one another by a predetermined angle of the value α with respect to the contact surfaces of the actuator. Prior art also fails to show, the inactive regions of the actuator assigned to the preceding internal electrode of a predetermined number preceding same internal electrodes of the same alignment; wherein, α is calculated according to the formula : $\alpha = \{(h/d) * \arcsin(L/R)\}$ wherein h is the predetermine height; d is the total thickness of the piezoelectric layer, the green film and the electrode layer, and L is the length of a secant on a cross sectional surface of the inner electrode and R is the radius of the multilayer actuator.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
